KEALEBOGA MASHABA DIRECTOR
SOLUTION IMPLEMENTATION- CLEAN ENERGY
TECHNOLOGIES

LETSOGILE BALOI CEO
NEW MARKETS AND PRODUCT ENGINEERING

Katlego Baloi
BACKEND EXTENSION Manager-Retail and
Operations Deployment

Honestly we do not want to do Bios of our executive team. Not yet any ways. Because it is work in progress and surely will change. Very soon because ImartOffice Consultants is a disruptor. Not only in the market but also of our personal lives. Katlego is a level 2 AAT and has suspended his studies to work at ImartOffice Consultants. He is responsible for the daily operations and for the ensuring that while others have buried their head in the cloud doing the all hairy and audacious ideas thing the company does not fold and close.

Letsogile Baloi has been off the grid for some time dedicating his time to developing ImartOffice Consultants progressing from Concept Development to Product Engineering. Letsogile is currently studying for his Chartered Accountancy ,CERA and FRM and has dropped from three postgraduate programs(Msc Applied Mathematics, MBA-IT, Msc Finance). His studies has been delayed while he is working on taking ImartOffice Consultants to market. He is the chief technology officer and responsible for market entry and company competitiveness. By merging phase 4 of ImartOffice Consultants with phase 2 Letsogile has to take General Insurance Actuarial Exams starting 2016

Kealeboga Mashaba is an environmental specialist with interest in clean energy technologies. Clean energy is phase 3 of imartoffice consultants so while other team members toil Mr Mashaba is patiently waiting for them to get their parts done. He is also responsible for Infrastructure deployment(both physical and human) and managing man and machines is such a challenging task. Question is why is he not taking his Energy Risk Professional exams in the interim? Mr Mashaba is currently engineering a solar plant and a coal to liquids solutions for an international public service entity.

IMART CloudonDemand Services

ImartOffice Consultants offers cloud computing not because it is a solution growing in popularity but because it offers efficiency and has a low TCO. We also address the three main concerns of Visibility, Control and Security. Our solution includes IaaS, PaaS, Colocation, Managed and On-demand Office applications, Unified communication as a Service, Managed Security as a Service and Complex IT Solutions managed in the cloud or Hosted on premise.

ImartOffice Consultants prides itself in offering high quality service with QoS monitoring service and Application Monitoring Services to ensure that mission critical applications are not congested in the network and that performance degradation is prevented through applications tracking and IP destination heat mapping.

CloudonDemand Services

Cloud Enablement and Migration Policy Formulation: We offer consulting services and help our clients gauge their cloud readiness so that an IT optimization strategy, data center consolidation and technology architecture can be developed and implemented within clear policy outlines.

System Integration and Cloud Solutions: We provide complex ICT solutions to the Enterprise and SME markets focusing Cloud based solutions (public or Hybrid), Virtualisation and on-premise IT systems

Computing as a Service: ImartOffice Consultants provide virtual servers and storage/backup as a service. Both public and private CaaS are offered as a solution. Other solutions on offer include MANAGED HOSTING and HOSTED PRIVATE CaaS

Our cloud services are aimed at increasing efficiency, flexibility QoS and reducing costs for SMBs and Enterprises. ImartOffice Consultants has invested in developing IT communications, integration and cloud data center infrastructure. The Imart services and applications on offer include basic email, online storage and fully fledged unified communications, CRM and ERP solutions. We also offer Microsoft cloud Enterprise Services, Google Apps and
